EchoStorm Speaks at Defense Geospatial Intelligence Event, London

Suffolk, Va. – Jason Barton, Co-Founder of EchoStorm Worldwide, spoke to senior defense and government officials from the United Kingdom and coalition partners about EchoStorm’s pioneering video and data management technology at the Defense Geospatial Intelligence (DGI) Conference in London, January 21-24.

On Technology Innovation Focus Day, January 21, Barton spoke about how the company’s battle-tested technology was the first to solve the problems of capturing, storing, and disseminating video for warfighters in a way that helps to gather the best intelligence and improve decision-making. EchoStorm technology deals with the problems of providing searchable video, secure video dissemination, interoperability between different networks, and mobility in harsh environments.

“In just five years, EchoStorm has built itself into a dynamic company with a variety of pioneering products,” Barton said. “One of our goals in developing more innovative video and data management tools is to help Coalition warfighters and the intelligence community with collaboration and to optimize the efforts of ISTAR [Intelligence, Surveillance, Target Acquisition, and Reconnaissance].”

EchoStorm Worldwide™

Video and Data Management Technology

More than 400 people attended DGI, which is Europe's annual gathering of senior officials in the defense geospatial intelligence community among Coalition countries. A fundamental objective of the event is to address interoperability and how to achieve common geospatial intelligence objectives through the coordination of national and multinational initiatives.
